How to Join Italian Intelligence: OSINT and SOCMINT Experts Wanted

Administrator | 10/05/2025 | OSINT

□□ Think you're good at open source investigations? The State is hiring

No, this isn't a spy thriller. It's a real public call from Italy's intelligence services, launched in May 2025.

The **Sistema di informazione per la sicurezza della Repubblica** has issued a new targeted recruitment campaign for experts in **OSINT**, **social media intelligence**, **cybersecurity**, and **terrorism analysis**.

Here's who they're looking for—and how you can apply.

□□ Who can apply: not just coders and hackers

The call is open to **graduates and technical diploma holders** with specific skillsets.

□□ OSINT and SOCMINT Analysts

- **Degrees in**: communication, sociology, international relations, or IT
- **Skills**: open web investigations, source verification, social network monitoring

- **Mission**: produce strategic threat reports for national security

□□ Cybersecurity Professionals

- **Backgrounds**: IT, engineering, math, telecoms
- **Key skills**:
  - Penetration testing (networks, apps, OS)
  - Malware analysis
  - Reverse engineering
  - Threat intelligence
  - Digital forensics

□□ Telecom and Signal Experts

  - **Experience in**: IP networks, RF systems, satellite communications, FPGA design
  - **Goal**: build and protect complex digital infrastructures

□□ Terrorism & Radicalism Analysts

  - **Fields**: international studies, political science, humanities

- **Knowledge**: jihadism, religious extremism, human trafficking, global crime

□□ Deadline, process and soft skills

□□**Apply by midnight, June 10, 2025**
□□ Access the official portal via SPID or CIE:
□□sicurezzanazionale.gov.it

□□**What they look for (besides skills)**:

- Strong sense of responsibility and discretion
- Reliability under pressure
- Loyalty to state institutions

□□**Selection process**:

1. Curriculum screening
2. Psychological and aptitude tests
3. Security clearance procedures (nulla osta)

□□□□ Why this matters (even if you're not James Bond)

In 2025, intelligence doesn’t rely only on wiretaps or field agents. The battlefield is **digital**.

Social media, dark web forums, encrypted chats—these are the new fronts of national threats. That’s why **Italy is seeking minds able to detect danger within tweets, images, metadata and chatrooms.**

If you can read between the lines of a post, map connections, or find patterns in chaos—you’re what they need.

□□ Key skills the intelligence agency is hunting for

Domain	Required Capabilities
OSINT	Google Dorks, Wayback Machine, WHOIS, Shodan
SOCMINT	Social graph mapping, real-time monitoring, geolocation
Cybersecurity	Reverse engineering, malware sandboxing, honeypots
Terrorism	Radical network analysis, dark web monitoring, foreign languages

□□ Who should apply?

This isn’t just for ex-military or seasoned analysts. The agency is open to **young professionals** who bring:

- Technical expertise
- Strategic thinking
- A commitment to national service

This is about **protecting your country with skills**, not weapons.

□□ It’s not just a job. It’s a national mission

Becoming part of the Italian intelligence system means working on the frontline of **digital and geopolitical security**.

It’s a demanding but meaningful role—where every small insight can prevent harm or uncover threats before they emerge.
